CAREER OBJECTIVE

Enthusiastic Computer Science Engineering student with a keen interest in Full-Stack Development, Software Engineering, Data Analytics, and emerging technologies. Experienced in transforming ideas into practical solutions through internships, academic projects, and patent-related work. Possess strong problem-solving abilities, a willingness to learn, and a passion for building efficient and user-focused applications. Seeking an opportunity to apply my technical skills, explore new technologies, and contribute meaningfully to impactful software projects while developing into a well-rounded technology professional.

EXPERIENCE

1.Data Science & Analytics Intern @ Future Interns

01/2026

1 Month

- Analyzed business sales data to identify customer trends, sales patterns, and key business insights.
- Cleaned and organized datasets to prepare them for effective analysis and visualization.
- Created an interactive Power BI dashboard to present important sales and customer-related metrics.
- Used data visualization techniques to transform raw data into clear and meaningful business insights.

2.Software Web Developer Intern @ Qbatzclay

03/06/2025 –
20/06/2025

- Developed a responsive ticket booking webpage using HTML, CSS, JavaScript, and React.js.
- Created reusable React components to build an interactive and user-friendly booking interface.
- Implemented responsive layouts to ensure a consistent experience across desktop, tablet, and mobile devices.
- Applied frontend development practices to improve page structure, navigation, and overall usability.

3.Artificial Intelligence Intern @ Viruzverse Solutions

29/12/2025 –
27/01/2026

- Developed an AI-based hand gesture recognition model to identify different hand gestures from visual input.
- Worked with image data and applied machine learning techniques for gesture classification.
- Performed data preparation and model evaluation to improve the accuracy and reliability of gesture predictions.
- Gained practical exposure to the AI/ML development workflow, including data preprocessing, model training, and testing.

EDUCATIONAL QUALIFICATION

B.E Computer Science Engineering
VSB College of Engineering Technical
Campus
CGPA: 8.55 till 6th Semester.

Coimbatore

Higher Education
Government Girls Higher Secondary School
Percentage: 78.7%.

Kadayanallur,
Tenkasi District

TECHNICAL SKILLS

Programming Languages

- Python
- Java

Data Analysis & Visualization

- MongoDB
- Power BI
- Data Cleaning

Web Development

- HTML, CSS, JS, React.js, Node.js, Tailwind CSS
- Responsive web design

Data Base
SQL

Tools & Technologies

Git, GitHub, Jupyter notebook

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst
Associate
NASSCOM

Big Data Computing
NPTEL

Data Science for Beginners
Board Infinity

Typewriting
First Class with Distinction

PROJECTS

1.Pantry Chef - Your Kitchen Companion

- Developed a React.js-based web application that suggests dishes based on the ingredients available to the user.
- Designed an interactive interface where users can enter available ingredients and receive suitable recipe suggestions.
- Built the project to make meal planning easier and reduce food wastage by utilizing available ingredients.
- Implemented a responsive and user-friendly interface to provide a seamless experience across desktop and mobile devices.
- Integrated backend services and database functionality to manage user data and support dynamic recipe-related operations.

2.Nourish360 - Personalized Wellness Platform

- Developed a full-stack wellness platform using React.js, Node.js, Express.js and MongoDB to provide personalized health and lifestyle recommendations.
- Designed an interactive React.js onboarding interface to collect user health, dietary, lifestyle, activity, sleep and goal-related information.
- Built a Node.js and Express.js recommendation engine to generate personalized meal plans, hydration goals, activity suggestions, sleep routines and daily wellness habits.
- Implemented MongoDB database functionality to securely store user profiles, preferences and wellness-related data for dynamic personalization.
- Developed a responsive and user-friendly UI using React.js, CSS and Tailwind CSS, ensuring a seamless experience across desktop and mobile devices.

PATENT PUBLISHED

1.Fault Prediction in Computer using IOT and ML Algorithms 2026
Published in Indian Patent Journal on 2026 (Design a predictive maintenance approach combining IoT sensor data with machine learning to flag hardware faults before failure).

2.Fraud Detection in Voting System Using Hybrid Biometric Scanner 2025
Published in Indian Patent Journal on 2025 (Proposed a dual authentication approach combining fingerprint and facial recognition to prevent duplicate/fraudulent voting).
